The Adjusted Financial Information from Continuing Operations should not be construed as an alternative to the reported results determined in accordance with generally accepted accounting principles. Further, the Company's definitions of adjusted income information may differ from similarly titled measures used by other companies. Management believes that the presentation of adjusted financial information provides additional information to investors to facilitate the comparison of past and present operations. While it is not possible to predict future results, management believes the adjusted financial information is useful for the assessment of the ongoing operations of the Company because the adjusted items are not indicative of the Company's ongoing operations due to their size and nature. Additionally, management uses adjusted financial information from Continuing Operations should be read in conjunction with the Company's historical financial statements and notes thereto contained in the Company's Quarterly Reports on Form 10-Q and Annual Report on Form 10-K.

"Total international system-wide retail sales" means the net sales of all Bath & Body Works stores and digital channels located outside North America and owned and/or operated by the Company's franchise, license and wholesale partners. While total international system-wide retail sales are not recorded as net sales by the Company, management believes the information is important in understanding the Company's financial performance because these sales are the basis on which the Company calculates and records certain net sales for its International business and are indicative of the financial health of the Company's franchise, license and wholesale partners and the prospects for growth of the Company's International business.
